CLAMPED METAL COATING

As it can also be understood from its name, Clamped Metal Coating means coating metal panels to roof by interlocking them without using screw. Connections are provided with invisible metal clips with sub construction.

METALS

For today Copper, Dyed Aluminum, Dyed Galvanized Sheet and Titanium Zinc Coatings are provided by using both domestic and European materials.

ФАЛЬЦЕВАЛЬНОЕ ПОКРЫТИЕ

Фальцевальное покрытие – вид покрытия крыши путём соединения металлических панелей без применения креплений. Присоединение к конструкции осуществляется при помощи незаметных металлических клипс.

МЕТАЛЛЫ

На сегодня используются при необходимости местные или европейские покрытия из Меди, Покрашенного алюминия, Покрашенного гальванизированного листа и Титанического цинка. Толщина данных металлов составляет от 0,50 до 0,70 мм.

We are Roof of the World

Metalçatı is roofing the world with standing seam systems.

Metalçatı brought standing seam systems to Turkey in 2000 that is one of roofing technologies, by developing a promptly understanding for meeting necessities in construction sector.

As completing a great number of important projects in Turkey with corporate service portfolio, Metalçatı proved it's matchless in this sector by being leader of quality and reliable service with its specialists in its team who have more than 30 years of experience.

Metalçatı, which extended its targets with its foreign projects which started in 2008, became a demanded name today for international state projects.

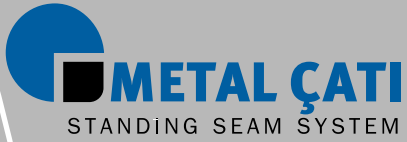

Фальцевая кровля

Мы являемся мировой кровлей. Покрытие мировой кровли при помощи металлической кровли и фальцевой кровли.

В связи с необходимостью в строительном секторе, "Металл чаты" в 2000 году привезло в Турцию одну из технологий кровельного покрытия – систему фальцевального покрытия кровли.

Благодаря спектру оказываемых услуг "Металл чаты" принял участие во многих проектах Турции, благодаря профессиональному персоналу, качественному и надёжному оказанию услуг на протяжении 30 лет, "Металл чаты" является лидером в данной области и не имеет конкурентов в данном секторе.

Расширяющий свои цели с международными проектами, начавшимися в 2007 году, имя "Металл чаты", является самым популярным в международных государственных проектах.
